

Meet-Me Room (MMR) Services

*Empowering global interconnection from
the heart of Toronto*

Telehouse Canada's Meet-Me Room (MMR) services enable businesses to build high-performance, scalable, and secure interconnections. Located in Canada's most connected data centre campus, our network and carrier-neutral MMRs bridge content providers, carriers, cloud platforms, and enterprises—locally and globally.

Designed to support low-latency, high-bandwidth connectivity, our MMRs provide a resilient and flexible environment for direct cross-connects, enabling faster data exchange, improved network performance, and reduced transit costs. Whether you're expanding your digital footprint, enabling hybrid cloud strategies, or connecting to global partners, Telehouse Canada's MMRs offer the infrastructure and ecosystem to power your growth.

Service Highlights:

Carrier/Network Neutrality

Connect directly to over 200+ connectivity partners across 7 interconnected MMRs on campus.

Expert Support

From provisioning to ongoing maintenance, our team ensures your infrastructure remains secure, stable, and scalable.

Fully Managed Service

Our support includes monitoring, inventory management, materials handling, record keeping, and patching—to maintain reliable operations.

Redundancy & Diversity

Multiple options for diverse connections between MMRs and colocation suites, including entrance paths, risers, and secure pathways.

Scalable Connectivity

Start with 24 connections and expand easily with pre-terminated patch panels—designed for fast deployment and effortless growth.

Cost-Efficient Deployment

Eliminate upfront capital investment and reduce truck roll costs with our optimized setup.

Future-Ready Architecture

Built to support AI, cloud, and edge computing workloads with modular expansion and redundant pathways.

Business Benefits

Accelerate Digital Transformation

Ideal for cloud providers, ISPs, CDNs, and enterprises seeking low-latency, high-bandwidth interconnection.

Boost Performance & Reliability

Direct cross-connects reduce latency and enhance data transfer speeds—backed by a 99.999% uptime SLA.

Enable Global Reach from a Local Hub

Access a world of connectivity from Toronto's most connected data centre. Instantly extend your digital footprint across continents—without the cost or complexity of managing infrastructure.

Simplify Multi-Cloud & Hybrid IT Strategies

Seamlessly connect to multiple cloud providers and IT environments through a single, centralized interconnection point—reducing complexity and improving agility.

About Telehouse

Telehouse is a leading global data centre service provider that brings together a diverse range of more than 3,000 business partners including carriers, mobile and content providers, enterprises, cloud providers and financial services companies.

Established in 1989 by Fortune 500 telecommunications company KDDI, Telehouse operates more than 45 data centres worldwide and provides reliable, secure, and flexible colocation solutions, enabling organisations to accelerate speed to market and create business opportunities through fast, efficient and secure interconnections.

Telehouse is committed to upholding the highest data centre standards and to delivering exceptional services for its customers.

Contact us regarding your requirements and we will propose the right solution for you.
