

Migration Services

Seamless Transitions. Secure Infrastructure. Strategic Growth.

Migrating IT infrastructure is more than a technical shift—it's a strategic move. Telehouse Canada offers a comprehensive end-to-end suite of migration services designed to minimize risk, reduce downtime, and accelerate your digital transformation.

Whether you are relocating part of your inventory or consolidating infrastructure, our experts ensure a smooth, simple, secure, and stress-free transition—with tailored support for both international and regional moves.

Service Highlights:

Project Management

Dedicated management of your migration project to ensure every detail is handled efficiently.

Infrastructure Audit

Thorough assessment of your existing infrastructure to identify needs and opportunities for improvement.

Rack Design & Equipment Layouts

Optimize your setup with expertly planned rack configurations and equipment layouts.

Cabling & Containment Design

Custom cabling design, installation, and containment solutions tailored to your needs.

Physical Migration

From decommissioning and secure transport to reinstallation and recommissioning, we handle it all.

New Equipment Installation

Smoothly integrate new hardware into your setup with minimal disruption.

Testing & Commissioning

Comprehensive testing and validation to ensure systems meet requirements and are ready for deployment.

Documentation Support

Reliable documentation assistance designed to meet regulatory, operational, and international logistics requirements.

Why Telehouse Canada?

Global Standards, Local Expertise

Backed by decades of global experience and deep knowledge of Canadian regulatory and business environments.

Carrier-Neutral Facilities

Flexibility to choose your preferred network providers and cloud platforms.

24/7/365 Support & Monitoring

Dedicated migration specialists and real-time monitoring ensure peace of mind throughout the process.

Security & Compliance

Our facilities and processes meet the highest standards for data protection and security.

Flexibility & Custom Support

Tailored solutions designed to fit unique business needs—ensuring seamless transitions and uninterrupted operations.

About Telehouse

Telehouse is a leading global data centre service provider that brings together a diverse range of more than 3,000 business partners including carriers, mobile and content providers, enterprises, cloud providers and financial services companies.

Established in 1989 by Fortune 500 telecommunications company KDDI, Telehouse operates more than 45 data centres worldwide and provides reliable, secure, and flexible colocation solutions, enabling organisations to accelerate speed to market and create business opportunities through fast, efficient and secure interconnections.

Telehouse is committed to upholding the highest data centre standards and to delivering exceptional services for its customers.

Contact us regarding your requirements and we will propose the right solution for you.
